**Healthy diet:** Maintain a balanced diet rich in fruits, vegetables, and whole grains. Certain foods, like leafy greens and berries, may help reduce cancer risk.

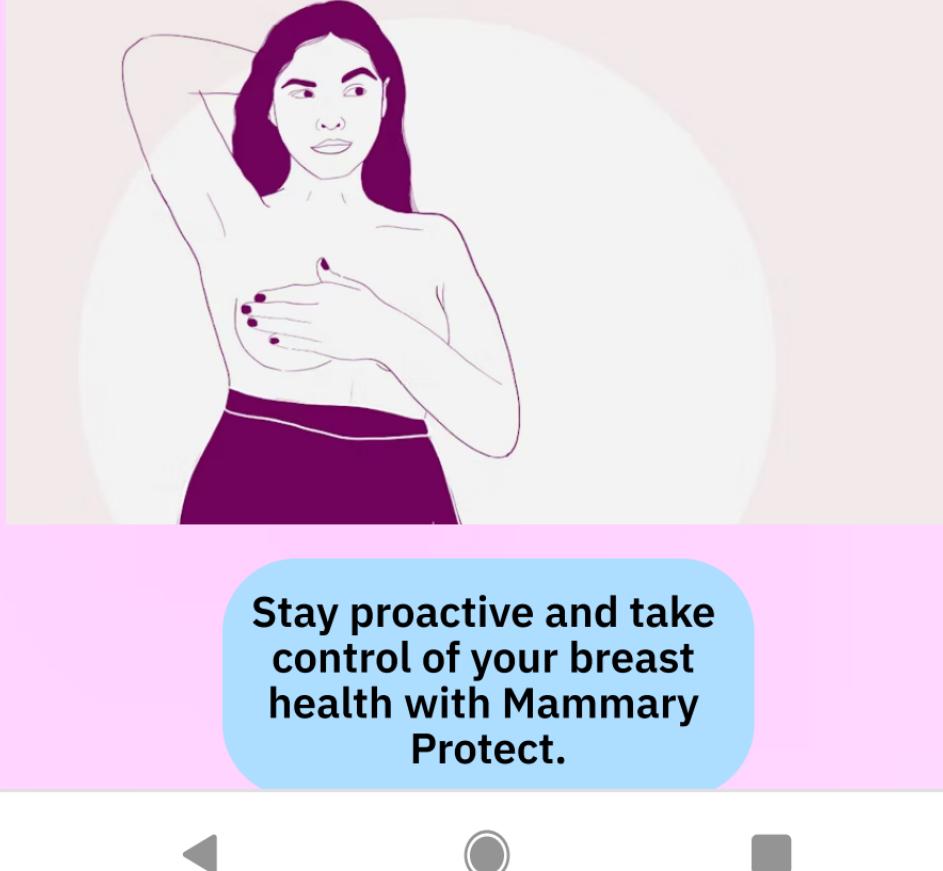

**Exercise Regularly:** Engage in regular physical activity to maintain a healthy weight and lower your risk of breast cancer. Aim for at least 30 minutes of moderate exercise most days of the week.

**4 to 7 hours of  
exercise per week  
can lower the risk  
of breast cancer by  
20-30%**

**Know Your Family History:** Be aware of your family's medical history, especially any instances of breast cancer, and discuss it with your healthcare provider to understand your risk.

**Stay proactive and take
